

CHOITHRAM SCHOOL MANIKBAGH INDORE

CLASS XII Session: 2017-18

SUBJECT : Multimedia and Web Technology
Scheduled Date. 14/07/2017

ASSIGNMENT No. 2
Submission Date. 19/07/2017

Q	Questions	Mark
1.	Differentiate between while and Do-while loop.	1
2.	Differentiate between GET and POST method?	1
3	Differentiate between actual and formal parameter.	1
<u>Very Short Answer</u>		
4	Identify and correct the error in the following code: While (\$ctr <= 5) \$stable + = \$ctr; ++ctr; }	2
5	If an array \$a=array(1,85,99,63,78); I. What is count(\$a); II. What is \$a(2);	2
6	What is an Array? How does it differ from ordinary variable?	2
7	Write a set of PHP statements to accomplish the followings: Sum of even number between 1 to 100 using a while loop , assume the integer variable N and ctr is to control the iterations in the loop.	2
<u>Short Answer</u>		
8	Give the output of the following code fragment when: i. opn='b' ii. opn='x' iii. opn='a' switch(opn) { Case 'a': echo " Platform Independent"; break; Case 'b': echo" Object Oriented"; Case 'c': echo "Robust and Secure"; break; default: echo "Wrong Input"; }	3
9	Write a PHP program to print the multiples of 3 up to 10 levels except number 24.	3
10	Convert the following segment into equivalent Do While loop: for(\$x=10;\$x<=100; \$x+=10) echo \$x;	3
<u>Long answer</u>		
11	Design a PHP form to convert the temperature from Celsius into different units according to the following page.	5

Temperature Conversion

Degrees:

Conversion Results	
5	celcius
41	fahrenheit
278.15	kelvin
500.6	rankine

12 Write a PHP program to print the following pattern:

```
1
1 2
1 2 3
1 2 3 4
1 2 3 4 5
```
