

CHOITHRAM SCHOOL, MANIK BAGH, INDORE

ANNUAL CURRICULUM PLAN SESSION 2017 – 2018

CLASS:

SUBJECT:

Month & Working Days	Theme/ Sub-theme	Learning Objectives		Activities & Resources	Expected Learning Outcomes	Assessment
		Subject Specific (Content Based)	Behavioural (Application based)			
June(7) –July(7)	Chapter:- Motion (PHYSICS) Distance, displacement, speed, velocity, acceleration, uniform and non uniform motion, elementary idea of circular motion, distance-time graph and velocity-time graph	Student must able to <ul style="list-style-type: none"> Understand the difference between displacement and distance. Understand the uniform and non-uniform motion. Find the relation $v = u + at$, $s = ut + \frac{1}{2}at^2$ and $v^2 = u^2 + 2as$. To understand the difference between velocity and speed. To understand the difference between velocity and acceleration. To understand 	<ul style="list-style-type: none"> Calculate the distance and displacement of self Calculate the average walking or running by evaluating the distance and time Show the nature or kind of motion of own or anybody. Analyze the graphical representation of velocity-time 	<ul style="list-style-type: none"> Measure the time it takes you to walk from your house to bus stop or the school. If you consider that your average walking speed is 4km/h estimate the distance if the bus stops or school from your school. Calculation should be in CGS system of unit and also plot nature of motion of graph. Take a meter scale and a long rope. Walk from one corner of a basket ball court to its opposite corner along its sides. Measure the distance covered by you and magnitude of the displacement. What 	<ul style="list-style-type: none"> They have learned the concept of distance and displacement They have learned difference between displacement and distance. They have learned the concept and examples of the uniform and non-uniform motion. They have learned to find the relation $v = u + at$, $s = ut + \frac{1}{2}at^2$ and $v^2 = u^2 + 2as$. They have learned the difference between velocity and speed. They have learned 	<ul style="list-style-type: none"> Measure the time it takes you to walk from your house to bus stop or the school. If you consider that your average walking speed is 4km/h estimate the distance if the bus stops or school from your school. Calculation should be in CGS system of unit and also plot nature of motion of graph. <ul style="list-style-type: none"> Unit test

		<p>the concept of uniform circular motion</p> <ul style="list-style-type: none"> To understand the concept of uniformly accelerated motion Distinguish the average velocity and average speed. Understand the concept of instantaneous velocity and acceleration. 	<p>or distance-time graph.</p> <ul style="list-style-type: none"> Analyze the concept of instantaneous velocity and acceleration by objects movement in circular path. 	<p>difference would you notice between the two in this case?</p> <ul style="list-style-type: none"> An electron moving with a velocity of 5×10^4 m/s enters into a uniform electric field and acquires a uniform acceleration of 10^4 m/s² in the direction of its initial motion. (i) Calculate the time in which the electron would acquire a velocity double of its initial velocity. (ii) How much distance the electron would cover in this time? Observation of instantaneous speed from speedometer and distance from odometer. Identify the motion of type. 	<p>the difference between velocity and acceleration.</p> <ul style="list-style-type: none"> They have learned the concept of uniform circular motion and its application in daily life. They have learned the concept of uniformly accelerated motion <p>They have learned the difference between average velocity and average speed</p>	<ul style="list-style-type: none"> Class Test <p>Numerical problems of related content</p>
<p>July(3) – August(8)</p>	<p>Chapter:- force and laws of motions force (balanced and unbalanced force) and motion, Newton's laws and its applications, inertia, momentum, Impulse, law of conservation of</p>	<ul style="list-style-type: none"> Understand the difference between balance and unbalanced forces. Understand the concept of force. Find the relation $f=ma$. Understand the concept of 	<ul style="list-style-type: none"> Apply the inertia of rest and motion like when a person standing in a bus falls backward when bus is start moving suddenly. Apply the concept and applications of Newton's laws in daily actions when a fielder pulls his hand backward; while catching a 	<ul style="list-style-type: none"> To study the roll of friction take two different balls one with smooth surface and other of rough. Using inclined plane. To just verify the concept of Newton's third law. 	<ul style="list-style-type: none"> They have learned the concept of force and difference between balance and unbalanced forces. They have learned the relation $f=ma$. They have learned the concept of inertia and its type. They have 	<ul style="list-style-type: none"> Assignment To study the roll of friction take two different balls one with smooth surface and other of rough. Using inclined plane. <ul style="list-style-type: none"> Numerical problems of related content

	<p>linear momentum.</p>	<p>inertia and its type.</p> <ul style="list-style-type: none"> • Understand the keys of Newton's laws. • Formulate the Newton's second law of motion. • Understand the concept of momentum and impulse. • Understand the concept and types of collision. 	<p>cricket ball</p> <ul style="list-style-type: none"> • Apply the concept of impulse and momentum in cricket or any game. 		<p>learned the keys of Newton's laws.</p> <ul style="list-style-type: none"> • They have learned the to formulate the Newton's second law of motion. • They have learned the concept of momentum and impulse. • They have learned the concept and types of collision. • They have learned the derivation of the relation between the KE and Momentum of body • They have learned the application of inertia of rest and motion in day to day life 	
--	-------------------------	---	---	--	--	--

					<ul style="list-style-type: none">• They have learned the application and concept of Newton's laws in daily actions.• They have learned the to calculate the force and momentum of object on the basis of Newton's laws.• They have learned the to calculate the mass, velocity after and before the collision. And calculate the recoil velocity of gun.	
--	--	--	--	--	---	--

<p>August(8)- September(8)</p>	<p>Chapter:- gravitation</p> <p>Newton's universal law of gravitation, free fall, acceleration due to gravity, mass, weight, pressure, thrust,</p>	<ul style="list-style-type: none"> • Understand the concept of Newton's universal law of gravitation. • Understand the concept of free fall and acceleration due to gravity. • Understand the meaning and concept of mass and weight. • Differentiate between mass and weight. • Differentiate between the acceleration due to gravity and universal gravitation constant. • Understand the concept of pressure and thrust. • Differentiate between pressure and 	<ul style="list-style-type: none"> • Apply the concept of free fall during the rain fall or any object fall from certain height • Calculate the mass or weight of object at any instant using value of acceleration due to gravity. • Analyses and conclude the situation for applying pressure or thrust for example why is it difficult to hold a school bag having a strap made of a thin and strong string? 	<ul style="list-style-type: none"> • A sphere of mass 40kg is attracted by a second sphere of mass 15kg when their centres are 20 cm apart, with a force of 0.1 milligram weight. Calculate the value of gravitational constant. • A body of mass 1 kg is placed at a distance of 2m from another body of mass 10kg. At what distance from the body of 1 kg, another body of mass 5 kg be placed so that the net force of gravitation acting on the body of mass 1 kg is zero? • Gravitational force acts on all objects in proportion to their masses. Why then, a heavy object does not fall faster than a light object? 	<ul style="list-style-type: none"> • The concept of Newton's universal law of gravitation. • The concept of free fall and acceleration due to gravity. • The meaning and concept of mass and weight. • The Difference between mass and weight. • The Difference between the acceleration due to gravity and universal gravitation constant. • The concept of pressure and thrust. • The Difference between pressure and thrust. • To Apply the concept of free fall during the rain fall or any 	<ul style="list-style-type: none"> • To calculate the kinetic and potential energy in free fall. And also the average velocity. • Class test • Numerical problems of related content
---	---	---	--	---	---	---

		thrust.			<p>object fall from certain height</p> <ul style="list-style-type: none"> • To calculate the mass or weight of object at any instant using value of acceleration due to gravity. • To Analyses and conclude the situation for applying pressure or thrust for example why is it difficult to hold a school bag having a strap made of a thin and strong string? • 	
<p>October(3)-November(8)</p>	<p>Chapter:- floatation</p> <p>density, relative density, buoyancy, Archimedes' principle , laws of floatation.</p>	<ul style="list-style-type: none"> • Understand the meaning of relative density and concept of buoyancy. • Understand the meaning and 	<ul style="list-style-type: none"> • Apply the concept of Archimedes' principle when swimming or floating. • Analyze the use and application of 	<p>The volume of a 500 g sealed packet is 350 cm^3. Will the packet float or sink in water if the density of water is 1 g cm^{-3}? What will be the mass of the water displaced by this packet?</p> <p>Lab Activitiy: -</p> <ul style="list-style-type: none"> • Determine the weight of object using Archimedes' 	<ul style="list-style-type: none"> • The meaning of relative density and concept of buoyancy. • The meaning and analyses the Archimedes' 	<p>Determine the weight of object using Archimedes' principal.</p> <p>Numerical problems of related content</p>

		<p>analyses the Archimedes' principle.</p> <ul style="list-style-type: none"> • Understand and aware about the laws of floatation. 	<p>Archimedes's principle.</p> <ul style="list-style-type: none"> • Analyze the concept of density or relative density to understand how the sink or float of an object persists. • Calculate the force requires floating of an object on the water surface using buoyancy. 	<p>principal.</p> <ul style="list-style-type: none"> • Determine the density of water. • Loss of weight in tap or salty water and effect on density. 	<p>principle.</p> <ul style="list-style-type: none"> • About the laws of floatation. • To apply the concept of Archimedes' principle when swimming or floating. • To analyze the use and application of Archimedes's principle. • To analyze the concept of density or relative density to understand how the sink or float of an object persists. • To calculate the force requires floating of an object on the water surface using buoyancy. 	
--	--	---	---	--	--	--

<p>December(3)- January (7)</p>	<p>Chapter:- work and energy</p> <p>work and types of work, energy and types of energy, conservation of energy</p>	<p>Student will be able to</p> <ul style="list-style-type: none"> • Understand the concept of work and its type. • Understand the concept of energy and its type. • Understand the meaning of different forms of energy and its uses • Understand the concept of conservation of energy. • Derive conservation of energy mathematically. • Derive the expression for potential and kinetic energy. • Differentiate between energy and work. • Understand the concept of power and average power 	<ul style="list-style-type: none"> • Apply the concept of work in daily actions like person carries a load on his head. • Analyze the situation to differentiate which type of work being preceded in some situation like pulling or pushing a roller. • Analyze the different forms and conversion of energy like chemical into electrical. • Calculate the power consumption of any mechanical body. • Calculate the energy consumption of any mechanical body and how much work is needed to perform that task. • 	<p>Lab Activity: -</p> <ul style="list-style-type: none"> • Showing them work done against frictional force inclined plane. • Showing work done against gravitational force. 	<p>Students have learned</p> <ul style="list-style-type: none"> • The concept of work and its type. • The concept of energy and its type. • The meaning of different forms of energy and its uses • The concept of conservation of energy. • To derive conservation of energy mathematically. • To derive the expression for potential and kinetic energy. • To differentiate between energy and work. • The concept of power and average power. • To apply the 	<p>Showing them work done against frictional force inclined plane. Numerical problems of related content.</p>
--	---	---	--	---	--	---

					<p>concept of work in daily actions like person carries a load on his head.</p> <ul style="list-style-type: none">• To analyze the situation to differentiate which type of work being preceded in some situation like pulling or pushing a roller.• The different forms and conversion of energy like chemical into electrical.• To calculate the power consumption of any mechanical body.• To calculate the energy consumption of any mechanical body and how much work is	
--	--	--	--	--	--	--

					needed to perform that task	
January(7)- February(5)	Chapter:- Sound (PHYSICS) sounds and wave & types of wave, terms related with sound like frequency, wavelength etc, reflection of sound, echo, Reverberation, sonic boom, ultrasound and its applications, SONAR, human ear	Students will be able to learn <ul style="list-style-type: none"> • Concept of sound and its propagation. • The meaning and concept of frequency, wavelength, time period. • Concept of loudness and pitch. • The meaning of intensity of sound. • The Difference between intensity of sound and loudness. • Meaning of echo and reflection of sound. • Concept of the 	<ul style="list-style-type: none"> • Apply the concept of sound propagation in loudspeaker. • Analyze the concept of loudness and pitch during public use of loudspeaker. • Analyze the concept of intensity to know the frequency, wavelength etc. • Analyze the concept of echo i.e. megaphone, stethoscope etc. 	<ul style="list-style-type: none"> • Verify the law of reflection of sound. • Calculation of pitch, loudness wavelength numerical problems. 	They have learned <ul style="list-style-type: none"> • The Concept of sound and its propagation. • The meaning and concept of frequency, wavelength, time period. • The Concept of loudness and pitch. • The meaning of intensity of sound. • The Difference between intensity of sound and loudness. • The Meaning of echo and reflection of sound. • The Concept of the reverberation 	<ul style="list-style-type: none"> • Annual exam

		<p>reverberation of sound and its application.</p> <ul style="list-style-type: none">• Meaning of sonic boom and ultrasound and its application.• Concept of the SONAR.• Concept of human ear and it's working.			<p>of sound and its application.</p> <ul style="list-style-type: none">• Meaning of sonic boom and ultrasound and its application.• Concept of the SONAR.• Concept of human ear and it's working.• Apply the concept of sound propagation in loudspeaker.• Analyze the concept of loudness and pitch during public use of loudspeaker.• Analyze the concept of intensity to know the frequency, wavelength etc. <p>Analyze the concept of echo i.e. megaphone, stethoscope etc.</p>

SUBJECT: Biology

Month & Working Days	Theme/ Sub-theme	Learning Objectives		Activities &Resources	Expected Learning Outcomes	Assessment
		Subject Specific (Content Based)	Behavioural (Application based)			
June july	<p>Theme - Improvement of food resources</p> <p>i)Crop variety improvement ii) Crop production management iii) Cropping Patterns</p>	<p>Students will be able to:</p> <p>know different types of crops like zayed, kharif and rabi and understand about micro and macro nutrients and about manures and fertilizers</p> <p>Analyze different cropping patterns like- Mixed, crop rotation, inter, organic farming.</p> <p>Share their opinion on improvement of crop variety.</p>	<p>To emphasized on development of skills like observational, experimental and inculcating values like Awareness, Responsibility, concern,</p> <p>Students will be able to identify Identify kharif, rabi and zaid crop when they will had them in food</p> <p>They will be able to apply to Interpret their growing and harvesting seasons by classifying them according to the availability in particular season.</p> <p>They will be able to evaluate that deficiency of nutrients affects the physiological processes in plants</p>	<p>To make a list of Rabi, Kharif and Zaid crops with their growing and harvesting season.</p> <p>class will be divided in a group of 7 following a star topology- a panel discussion on manure verses fertilizers will be conducted. Points of discussion will be similarities and dissimilarities along with disadvantages of fertilizers will be recorded and presented by the group leader.</p>	<p>1) Learner learnt and understood about importance of animal husbandry. 2) Students were able to identify that livestock farming is done for dairy and drought and marine-culture not only provides seafood but also for pearl cultivation along with the difference between broilers (consuming) and layers (for eggs production). 3) Students were able to share their opinion on improvement of animal variety through breeding. 4) They were able to evaluate different types of farming practices like – poultry, fish, bee-keeping of different states or places. 5) They were able to explore their critical thinking on the main aim of improvement of food resources and were able to justify different revolutions done by government for improvement of food resources. 6) They were able to apply their knowledge to relate quality of honey depends on pasturage (availability of</p>	<p>News Analysis Subject enrichment activities Unit Test Assignment</p>

	<p>Animal Husbandry Cattle farming and poultry farming, Eggs and broiler production Fish production-i) marine ii) Inland, Bee keeping- Apiculture</p>	<p>Explore their critical thinking by studying the importance of plant breeding.</p> <p>To make them learned and understand about importance of animal husbandry. 2) To enhance the ability to analyses different types of animal</p>	<p>including reproduction, growth and susceptibility to disease. They will be able to construct biological waste into different types of manure. They will be able to Appreciate the importance of organic farming. They will be able to evaluate consequences of fertilizers over manure.</p> <p>To emphasized on development of skills like observational, diagrammatical and experimental and inculcating values like Creativity (while drawing the diagram), Awareness (about different types of animal livestock management), Care and Safety(Proper</p>	<p>News analysis:- search a news on latest innovations in agricultural practices and crop production and analysis it according to understanding.</p>	<p>flower for nectar collection).</p> <p>7) They were to analyzing different adulterates present in food stuff. (like spices, arhar dal) as well as able to interpret that adulterated food items leads to health problems.</p>	
--	--	--	--	--	--	--

		<p>livestock management</p> <p>3) To make them share their opinion on improvement of animal variety through breeding.</p> <p>4) To evaluate different types of farming practices like – poultry, fish, beekeeping of different states or places.</p> <p>6) To justify the main aim of improvement of food resources.</p> <p>7) To analyses different revolutions done by government for improvement of food resources.</p>	<p>housing keeping of animals are required to keep them healthy and to increase production),</p> <p>Cleanliness(Its required to keep animals disease free),</p> <p>Environmental Concerns(Animals should not serve as source of diseases)</p> <p>Responsibility(concern for sustainable management)</p> <p>Students will be able to identify that livestock farming is done for dairy and drought and mari-culture not only provides seafood but also for pearl cultivation.</p> <p>They will be aware about difference between broilers (consuming) and layers (for eggs production) as well as different breeds of cattle, fishes, honey bees etc.</p> <p>They will be able to apply their knowledge</p>	<p>To test the presence of adulterants in food stuff.</p>		
--	--	--	---	---	--	--

			<p>to relate role of pasturage (availability of flower for nectar collection) determines the quality of honey. They will be able analyzing different adulterates present in food stuff. (like spices, arhar dal)</p> <p>They will interpret and will be able to share their opinion on that adulterated food items leads to certain disorders.</p>			
July - Aug	<p>Fundamental unit of life</p> <p>Diffusion and Osmosis</p> <p>Permeability- Impermeable, Semi-permeable, Permeable</p> <p>Tonicity of solution - Hypotonic, Isotonic and Hypertonic solution.</p>	<p>Students will be able to:</p> <p>1) Know about cell and structural organization of cell.</p> <p>2) Understand the role and importance of different organelles present</p> <p>3) Analyze the function of cell membrane and cell wall with</p>	<p>1) Identify the process of Diffusion and osmosis with real life examples like salt on salad and Burning of agarbatti or opening of perfume or fragrance of cooked food..</p> <p>2) Interpret swelling of raisin in desserts is due to imbibitions..</p> <p>3) Evaluate that if salt is added into vegetables during cooking its release water due to process of exosmosis..</p>	<p>To prepare stained temporary mounts of onion peel and to record observation and draw their labeled diagrams.</p> <p>To observe the result of hypertonic solution the concept of plasmolysis will be explained to the students.</p>	<p>1. Learner learnt and understood about cell and structural organization of cell.</p> <p>2. Skills like observational and experimental were developed in the students and values like division of labor and team work (as all the organelles divide the work among themselves), leadership (as nucleus work as controlling unit), obedience (as all organelles obey the command of controlling unit) were inculcated among the students.</p> <p>3. Students were able to identify that cuts and wound</p>	<p>To study the concept of Permeability, tonicity and osmosis with its types by preparing potato osmometer</p> <p>Unit Test Assignment</p>

	<p>Eukaryotic cell Structural organization of cell- Nucleus-Its role and functions, Cytoplasm-its role and importance, ER- its role, importance, functions and types, Golgi bodies-role and functions, Lysosomes and Mitochondria- role, functions and importance Ribosome and vacuoles- Types, structure, role and function and Plastid</p>	<p>learned and understand about cell and structural organization of cell. 2) To enhance the ability to comprehend the role and importance of different organelles present in the cell. 3) To make them share their opinion on evolution of self autonomous organelles like- Mitochondria and plasmid 4) To enhance the ability to understand the mechanism of different organelles with reference to their importance in vital role of life</p>	<p>division of labor and team work (as all the organelles divide the work among themselves), leadership(as nucleus work as controlling unit), obedience (as all organelles obey the command of controlling unit) Students will be able to identify that cuts and wound heals due to the process of cell division They will be sensitized and will be able to apply their knowledge that genetic disorder cannot be cured. They will be analyzing that formation of one organelle facilitates the formation of other organelle which will inculcate the value of coordination. They will interpret and will be able to share their opinion on evolution of self autonomous organelles like- Mitochondria and plasmid</p>	<p>To prepare stained temporary mounts of human cheek cells and to record observation and draw their labelled diagrams.</p>		<p>To prepare stained temporary mounts of onion peel and human cheek cells and to record observation and draw their labeled diagrams.</p>
Aug- sep	Tissue Plant tissues- Meristematic tissue,	To make them learned and understand about	To emphasized on development of skills like observational,	To observe permanent slides of different permanent tissues like parenchyma, collenchyma,	1. Learner learnt and understood about tissues and structural organization of	To observe permanent slides of different permanent tissues like

	<p>permanent tissue - simple tissue, Complex permanent tissue</p> <p>animal tissues- epithelial tissue, Connective muscular and nervous tissues</p>	<p>tissues and structural organization of different tissues</p> <p>2) To enhance the ability to analyses the role and importance of different tissues present in plants and animals.</p> <p>3) To make them share their opinion on simple and complex tissues.</p> <p>4).To evaluates different function of tissues depending on their location and structure.</p>	<p>diagrammatical and experimental and inculcating values like Creativity (while drawing the diagram), Awareness (about location of different tissues of plant and animal), Responsibility(function of one tissue leads to the formation of other tissue), Coordination(collectively all the tissues works together in body to accomplish the work), Division of labor(works are divided among different tissues in the body to avoid overloading)</p> <p>Students will be able to identify that obesity is due to adipose tissue which stores fat in our body.</p> <p>They will be aware and will be able to apply their knowledge that wrong postures while sitting, lying or watching T.V affects different tissues present in the body.</p> <p>They will be analyzing that pumping of heart, jumping of frog and writing with hand or</p>	<p>sclerenchyma, Xylem and phloem.</p> <p>They will draw and their labeled diagrams.</p> <p>To identified striped, unstriped, cardiac, bones, nerve tissue from prepared slides and draw their labeled diagrams.</p>	<p>different tissues</p> <p>2) Students ability were enhanced to analysed the role and importance of different tissues present in plants and animals.</p> <p>3) They were able to share their opinion on simple and complex tissues.</p> <p>4).They were able to evaluates different function of tissues depending on their location and structure.</p> <p>Development of skills like observational, diagrammatical and experimental and inculcating values like Creativity (while drawing the diagram), Awareness (about location of different tissues of plant and animal), Responsibility(function of one tissue leads to the formation of other tissue), Coordination(collectively all the tissues works together in body to accomplish the work), Division of labor(works are divided among different tissues in the body to avoid overloading) were enhanced in the students.</p> <p>Students were able to identify that obesity is due to adipose tissue which stores fat in our body beneath the skin..</p> <p>They were aware that wrong postures while sitting, lying or watching T.V affects different</p>	<p>parenchyma, collenchyma, striped, unstriped, nerve tissue from prepared slides and draw their labeled diagrams.</p>
--	---	--	---	--	---	--

			<p>movement depends on different voluntary and involuntary muscles. They will interpret and will be able to share their opinion on occurrence of sprain is due to over stretched of ligaments, fatigue is due to accumulation of lactic acid in muscles.</p>		<p>tissues present in the body. They were able to analyzed that pumping of heart, jumping of frog and writing with hand or movement depends on different voluntary and involuntary muscles. They were able to interpret and were be able to share to their opinion on occurrence of sprain is due to over stretched of ligaments, fatigue is due to accumulation of lactic acid in muscles.</p>	
--	--	--	--	--	---	--

Oct-nov	<p>Theme - Why do we fall ill</p> <p>Subtopic- Healthy and disease-free</p> <p>Acute and chronic disease</p> <p>Principle of treatment and prevention</p>	<p>To make them learned and understand about know about disease and their agents and to enable learners to differentiate between Healthy and Disease free person.</p> <p>To enhance the ability to learned and understand role and importance</p>	<p>To emphasized on development of skills like observational, experimental and inculcating values like Awareness, Responsibility</p> <p>Students will be able to identify that healthy and disease free do not convey same meaning.</p> <p>They will be aware and able to expand ORS, WHO and AIDS</p>	<p>To observe a video on types of diseases.</p> <p>Group discussion on IS PERSONAL AND COMMUNITY ISSUES BOTH MATTER FOR HEALTH.</p> <p>To make a case study on any Chronic disease on the basis of-target organ, sign, and specific prevention.</p> <p>Life cycle of mosquito</p>	<p>1.Learner learnt and understood about disease and their agents</p> <p>2) Students ability were enhanced to analysed the role and importance of different infectious agents, diseases and how to prevent and treat these disease and to make them understand about personal and community health.</p> <p>3) They were able to share their opinion on concept of Auto -Immune system.</p> <p>4).They were able to</p>	<p>To make a case study on any Chronic disease on the basis of-target organ, sign, and specific prevention.</p>
----------------	---	---	--	--	--	---

		<p>of different infectious agents, diseases and how to prevent and treat these disease and to make them understand about personal and community health.</p> <p>To make them share their opinion on various infectious agents and to understand the concept of Auto-Immune system.</p> <p>To explore their critical thinking by studying the application of Immunization and Vaccination the different various infectious agents, diseases and how to prevent and</p>	<p>They will be able to apply their knowledge that lot of garbage and water accumulation provided ideal sites of breeding of mosquitoes and only female mosquitoes feed on human blood due to requirement of more nutrition to lay eggs and cause malaria and malarial antidrug Quinine is extracted from Cinchona tree.</p> <p>They will be able to analyze harmful effects of active and passive smoking and importance of NO SMOKING ZONES in the cities.</p> <p>They will be able to interpret the reasons AIDS is not considered as</p>		<p>evaluates application of Immunization and Vaccination</p> <p>Development of skills like observational, experimental and inculcating values like Awareness, Responsibility</p> <p>They were aware that lot of garbage and water accumulation provided ideal sites for spreading of many diseases like malaria, cholera etc...</p> <p>They were able to analyze that only female mosquitoes feed on human blood due to requirement of more nutrition to lay eggs.</p> <p>They were able to analyzed importance of NO SMOKING ZONES in the public places.</p> <p>They were able to interpret AIDS is not considered as disease but syndrome.</p>	
--	--	--	--	--	--	--

		<p>treat these disease.</p> <p>5) To evaluate different function of various vaccines and to inculcate the knowledge of various vaccines and preparation of vaccination chart of a child.</p> <p>6) To justify the concept of vaccination in real</p>	<p>disease but syndrome.</p> <p>They will be able to evaluate the importance of vaccination in child.</p>			
Nov- Dec Jan	Diversity in living organism	<p>1) To make them learned and understand about know about binomial nomenclature, hierarchy of groups classification.</p> <p>2) To enhance the ability to analyses the role and importance of different level of classification</p>	<p>To emphasized on development of skills like observational, experimental and inculcating values like Responsibility, Coordination and Collaboration, Creativity, Awareness, Concerns, Coordination</p> <p>Students will be able to classify the living organisms</p>	<p>1. To study various types of plants and animals through permanent slides or specimens.</p> <p>2. To draw the diagram of different division of plant kingdom and labeled it correctly</p>	<p>1) Learner learnt and understood about binomial nomenclature, hierarchy of groups classification.</p> <p>2) Students ability were enhanced to analysed the role and importance of different level of classification among plantae and animalia</p> <p>3) They were able to share their opinion on on various level of organisation.</p> <p>. 4).They were able to</p>	<p>To study the slides and specimens of agaricus, moss, fern, pinus, earthworm, cockroach, fish and birds and record their phylum , characteristic features and diagram.</p>

		<p>among plantae and animalia</p> <p>3) To make them share their opinion on various level of organisation.</p> <p>4) To explore their critical thinking by studying different divisions of plant kingdom.</p> <p>5) To evaluate different phylum of animal kingdom.</p> <p>6) To justify the concept like diploplastic triploplastic, and symmetry-asymmetry, bilateral etc.</p>	<p>around them.</p> <p>They will be able to analyze the difference between evolution and classification.</p> <p>They will be able to understand that after monsoon blue green algae which is develop on moist soil is good sources of protein and act as crop yield booster.</p>		<p>evaluates application of blue green algae as crop yield booster.</p> <p>5) Development of skills observational, experimental and inculcating values like Responsibility, Coordination and Collaboration, Creativity, Awareness, Concerns, Coordination</p> <p>6) They were able to analyzed difference between evolution and classification.</p> <p>7) They were able to interpret importance of algae in environmental concern..</p>	
Jan-Feb	Natural resources	<p>1) To make them learned and understand about Resources on earth.</p> <p>2) To enhance the ability to</p>	<p>To emphasized on development of skills like observational, experimental and inculcating values like Care and Safety,</p>	<p>1)To demonstrate that air currents are caused by uneven heating of air</p> <p>2) To study about ozone layer and then do the comparison in size of ozone hole in last few years.</p> <p>3) Draw a poster on consequences of global warming and name the green</p>	<p>1.Learner learnt and understood about Resources on earth.</p> <p>2) Students ability were enhanced to analysed the role and importance of different bio-geo chemical cycle.</p>	<p>Draw Nitrogen cycle and name two biologically important compounds that contain both oxygen and nitrogen</p>

		<p>analyses the role and importance of different bio-geo chemical cycle.</p> <p>3) To make them share their opinion on pollution</p> <p>4) To explore their critical thinking by studying the importance of green house effect.</p> <p>5) To evaluate the importance of ozone layer.</p> <p>6) To justify the concept of water cycle</p>	<p>Cleanliness, Environmental Concerns, Obedience, Responsibility, Awareness.</p> <p>Students will be able to identify about environmental concern about Taj Mahal and heritage monument and effect of acid rain on these monuments</p> <p>They will be aware smog is due to pollution.</p> <p>They will be able to apply their knowledge that smog and zero visibility in Delhi is due to air pollution which leads to traffic jams and accidents.</p> <p>They will be able to analyze that excessive nutrient in water bodies due</p>	<p>house gases.</p> <p>4) Draw Nitrogen cycle and name two biologically important compounds that contain both oxygen and nitrogen.</p>	<p>3) They were able to share their opinion on on pollution.</p> <p>4).They were able to evaluate application importance of green house effect.</p> <p>5) Development of skills like development of skills like observational, experimental and inculcating values like Care and Safety, Cleanliness, Environmental Concerns, Obedience, Responsibility, Awareness were incorporated in students.</p> <p>6) They were aware about environmental concern and effect of acid rain on these monuments</p> <p>7) They were able to analyze that smog and zero visibility is due to air pollution which leads to traffic jams and accidents</p> <p>8) They were able to interpret that excessive nutrient in water bodies due to pollution leads to</p>
